Part B for May 1915

SUBJECT

Proposal for the supply of Brakna town fresh water to the Brakna town.

G. O. No 8225-7 dt. 21-4-15

Sanctions the proposal to sink a well at a cost of Rs 1200/- and calls for suitable proposals in the matter of pumping water, for reasons given.

Asst Saran 16/5/15

Chd—S.S.D—21-7-15

of rain which have recently fallen in the Arsikere Town, have improved the supply of water in the existing wells. Besides more rains are expected, and the Municipality do not consider it necessary to spend money for getting and working a pumping plant now. In these circumstances, I am of opinion that the arrangement originally proposed may be held over, at any rate, for the present.

I have the honour to be,

Sir,

Your most obedient servant,

Offg Deputy Commissioner,

Hassan District.

Sir,

Adverting to Government Order No. 8225-7/Ml 182-12 dated 21st April 1915 sanctioning the proposal of the Municipal Board of Arsikere to sink a well at a cost of Rs1200/- in the Arsikere Municipality, and requesting me to make other suitable proposals in the matter of pumping water &c, I have the honour to state that I inspected the place on the 28th ultimo in company with the Sub Division Assistant Commissioner, the Amildar, and some of the Municipal Members, and selected a suitable site and made the necessary arrangements for the sinking of the well in the Town. Needful instructions have been given to the Amildar to put the work on hand at once, and to take a personal interest so as to secure for the town a permanent and useful source of water supply out of the grant liberally voted by the Municipality and kindly sanctioned by Government

2 As regards arrangements for pumping water to the town, it is considered unnecessary to take any steps at present, as the most trying months of March and April have now been tided over, though with much difficulity, and two good showers

of

hence, to the proposal of
Municipal Board(1) to
pump water into the existing
service Reservoir pipe line
on the well Situated in the
Nagar road with the aid
an oil Engine pump to be
loaned by the D.P.W and
(2) to sink a well opposite
Mosjid at a Cost of Rs 1200
Supplement the above supply the Cost being met
from the provision of Rs 3000/ under 8(1) original works in the Current
Year Budget

225-7-ml/82-12=12.8.4.6.15

The proposal (2)
to sink a well at a Cost of Rs 1200
Sanctioned, the Cost being met from the Sinking
Funds and
2. As it is reported
by the D.W Deptt there is no
pumping plant to spare
the Dy Com" is requested to
make other suitable proposals
in the matter of pumping water.

Sir,

In continuation of the correspondence ending with my letter No: 341 dated 19—3—1915— in the matter of water-supply to Arsikere town, I have the honour to state that I again inspected all the existing sources of supply, viz. the dug wells in the town and found them running short as difficulty is likely to increase as the summer advances.

station for pumping water to the reservoir
as explained above should in my opinion
be taken on hand at once in order to take
over the present Summer Season.

7. I request, therefore, that the estimate
for the well may be Kindly Sanctioned,
the cost being met from the provision
Rs 3000/- under D 1. original works in the
budget of the current year, of the Arsikere
Municipality. Orders may, further, be
Kindly passed as early as possible in the
matter of the D P W arranging to supply
and instal the oil Engine for pumping
the water to the town.

8 The Necessary papers file ending
with General Assistant Commissioners
Yadi no 765 dated 2.12.14 to herewith
Submitted for reference and favour of
return.

I have the honour to be,
Sir
Your most obedient Servant.

[signature]

Vice Deputy Commissioner
Hassan District

Some further particulars should be obtained from the Public works Department. I am arranging to address the Superintending Engineer on the Subject and to get the necessary particulars from him. This will necessarily take some time and the decision on the Subject of a permanent water Supply Scheme cannot therefore be brought to disposal at once.

4. In the meanwhile, in View of the pressing needs of the town, the Arsikere Municipal Council have resolved that, at present, the Sinking of two wells, one opposite the masjid and the other by the Side of Bangalore - Honnavar road is quite necessary and that it is expected that good drinking water can be tapped in these localities. It is however found that the well by the Side of Bangalore - Honnavar road would be expensive as the land is in a high level and rock is likely to be met with. There is no doubt that the town of Arsikere has begun to Suffer badly for want of water and the difficulty is Sure to increase as the Summer advances this year. It is Very necessary that Some Special measures Should be adopted at once to alleviate the difficulty which has already begun and which is felt particularly during the large gathering of

of men and cattle at the weekly Shandy.

The supply of water in the existing wells is getting very scanty and the wells proposed to be sunk will necessarily take some time to be completed, and I am of opinion therefore, that other measures of relief in this respect are urgently called for. I therefore, propose, with the concurrence of the Municipal Councillors and the leading residents, that arrangements should be made at once for pumping water from the well sidetabled on the Kuliyan road into the Service Reservoir through the existing pipes as was done during the Summer of 1909. The municipality will bear the charges connected with the hiring and working of the machinery. Though such charges are stated to have amounted on the previous occasion to Rs 150/- per mensem, the municipality are given to understand that, by the use of an oil Engine for pumping, the charges could be reduced to about Rs2/- a day. The well, the Service Reservoir and the pipe line are all ready and the former only require some Sundry repairs to work the System.

6. The Sinking of a well opposite the Masjid at a cost of Rs 1200/- as per estimate enclosed in the records and the immediate

provision

to bear the initial expenditure of the Supply Scheme, the Municipality has to maintain the same at an annual expenditure of Rs 600/- by levying extra water cess and that, for the present, the Sinking of two wells at a total cost of Rs 3200/- is very necessary.

3 On the 15th instant, I took the opportunity of meeting the Municipal members and leading men at Ansekne and also inspected the several localities connected with the existing and proposed sites for the wells to be sunk therein. On a full discussion of the matter, it was apparent that the supply of drinking water to Ansikere town by means of pumping water either from Ansekere tank or Munnappanaikankere after prohibiting cultivation below them, or from Hanchalli or Yelavare tank as suggested by the Secretary, Public works Department, would be very costly and beyond the means of the Municipality to undertake the same at their own cost, and that the maintenance charges would also be very high. Full details were not, however, available, and it was considered that before expressing a final opinion as regards financing the Scheme and deciding the ways and means therefor,

3. If the Municipality agree to pay Rs. 150 per month towards the working expenses and the hire of the machinery, similar temporary arrangements may be ordered this season also, but the question of providing a permanent supply to the town is a complicated one and requires time for consideration and development.

Water will have to be pumped from the Arsikere tank or Thimmappanaikankere after prohibiting cultivation below them, or a costly gravitation scheme thought of from Harnahalli or Yalavari tank.

4. The question is being investigated by the Executive Engineer, Water Supply and Stores Division. The capital cost is likely to amount to Rs. 25,000 and recurring charges will be about Rs. 5,0(If the Municipality can finance the scheme, detailed projects will be worked out.

JJ
19/3

Ins 182 - 12 7

dated the 2nd March 1910

Note by the Offg. Secretary to Government, Public Works Department, on Arsikere Water Supply.

The question of providing a suitable water supply to Arsikere town has been under correspondence from 1889, bu so far no permanent scheme has been devised and carried out.

2. In 1908 when the supply got very scanty, two wells were sunk--one close to the Musafirkhana and another in a valley by the side of the road leading to Tirupathi.

The first well had to go 84 feet before potable water could be tapped an cost Rs. 4,027. The second well in th Huliyar road lying in loamy soil yielded only brackish water. A line of 3" cast iron pipes was laid from this well to the town and a service tank built at a cost of Rs. 7,672. An engine and centrifugal pump were lent to the Municipality by the Public Works Department and water was pumped from the well into the service reservoir at a cost of Rs. 850 till October 1909 when the work was stopped, as the Municipality pleaded their inability to continue to pay the working charges.

The Engine and pump were removed but the pipe line and service reservoir are there.

It was stated that the supply of water at Arakere was not as good as it was in many other towns of this size and importance but that the town could not afford an expensive scheme & that the sinking of one more well near the Sandi pools was all that was necessary then. The question was referred to the Ind Board of Arakere for taking necessary action in the matter. This circumstance was before Govt when they ordered that some effective means of supplying the town with fresh water should be found for the rising town of Arakere.
